

Overview

The Venture Information System (VIS) is a web-based software package designed specifically for importers to improve business efficiencies in the areas of "venture" (shipment) tracking, inventory management, and associated logistics. It comes integrated with QuickBooks® to facilitate record keeping and sophisticated financial analysis.

Side-by-Side Rating	Landed Costs	Profit & Loss at Shipment Level	Shipment Tracking	Importer's Document Management	Currency & Unit of Measure Conversion

- Late Shipment Alerts
- Inventory Replenishment Alerts

Are you still tracking your Landed Costs by Hand? The Venture Information System is a web-based Software package designed to turn chaos into order!

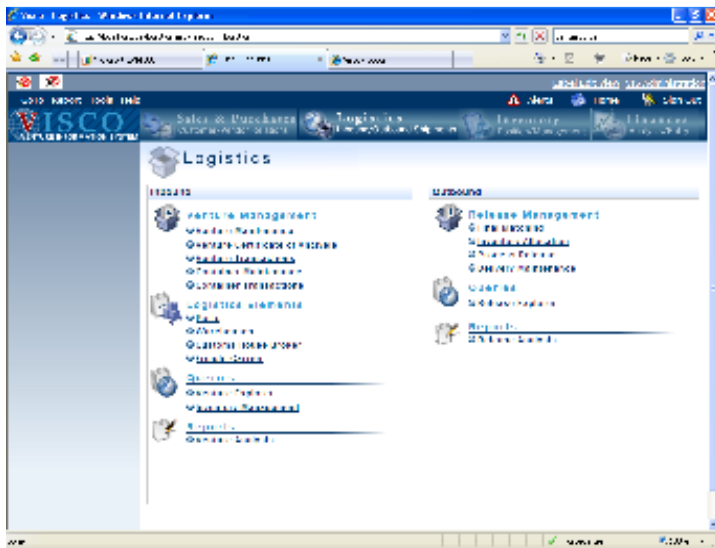

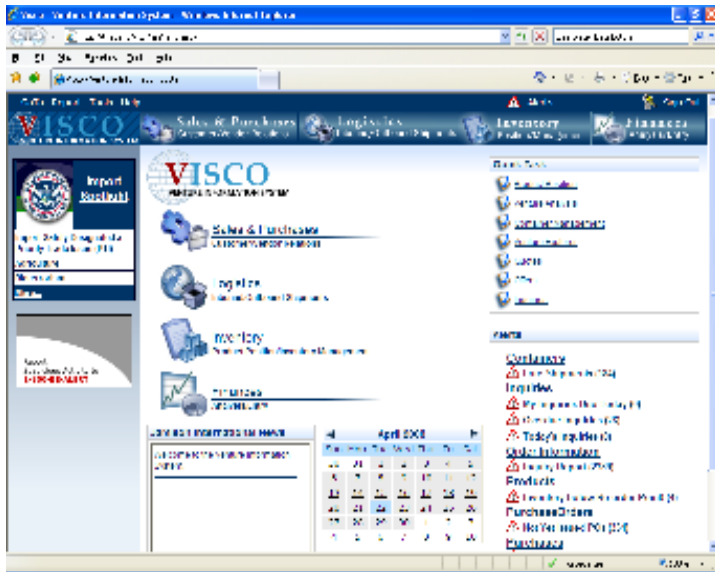

Microsoft®
CERTIFIED
Partner

Our product integrates with QuickBooks Pro, Premier, and Enterprise Edition, which has the most comprehensive tools for fast and easy financial management--including tools for business planning, forecasting, and analysis to help you achieve better results. Premier Edition also features advanced accounting and inventory tools that meet your more specialized needs.

QuickBooks and the QuickBooks logo are trademarks of Intuit Inc., displayed with permission.

“Our approach to the development of the Venture Information System was from the sales, financial and logistic perspectives. Rather than beginning with a system for record keeping and accounting; then trying to incorporate inventory tracking and financial analysis, we completely reversed the development process” says VP Tim Peck.”
